Edmund V. Gillon Jr. : Cut Assemble Frank Lloyd Wright's Robie House: A Full-Color Paper Model (Dover Children's Activity Books) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Cut Assemble Frank Lloyd Wright's Robie House: A Full-Color Paper Model (Dover Children's Activity Books):

2 of 2 people found the following review helpful. Looks like fun! By K. Cleavelly I bought this because I am a big FLW fanatic, and have just about every book written about him. I really want the Lego model of the Robie House, but this model is much cheaper! It looks like it is going to be a lot of work, and I'm not sure why it is listed as a children's book

as they would need a LOT of adult supervision to complete it. Someday I'll get the Lego one, but in the meantime, this looks like it will be a nice display piece once it is done. We adults need our toys, too!

0 of 0 people found the following review helpful. great detail, expert skill required

By Jamey Scally

Im an advanced crafter and modeler and this was extremely challanging for me - definately not for a novice

5 of 6 people found the following review helpful. So worth the work! Like having a Wright home in your own home!

By Greg Brinker

This is a very rewarding project for any Frank Lloyd Wright enthusiast. I took my time building the home,being very carefull because the little details add up when your done. Make sure you have a good exacto knife,and figure out a way of scoring the paper that works for you. Having good scored folds is very important to making the overall look clean and not "bent". I did not glue every piece down while I went along,I just glued them together and it worked just fine,I will glue the entire home down at one time. I did run into a few very minor printing errors,but did not experience the problem with piece 57 as stated before. Everything really goes smooth when you have a good technique,the stairs are still pretty tricky though lol!!

Now time for plants and painting!!

Designed in 1908 as a suburban residence for a Chicago businessman, the Robie House embodied the full spirit of Frank Lloyd Wrights pioneering "prairie school" of design. Today, this masterpiece of modern architecture remains a classic example of the builders ideas and ideals.

Long, low, streamlined and exemplary of the prairies spaciousness, the Robie House profoundly influenced the course of American architecture so much so that a model of Wrights innovative structure has long been on display at the Museum of Modern Art in Manhattan.

Now model builders as well as lovers of fine architecture can construct an accurate three-dimensional model of the Robie House, and thereby discover for themselves the harmonious interrelationships of parts and numerous other design details that make this home a world-famous architectural masterpiece.

Printed in full color on sturdy card stock, the model comes complete with step-by-step instructions and exploded diagrams. A series of multi-level horizontal planes includes balconies, platforms, a porch and entrance court, while easy-to-follow directions clearly explain how to cut, fold and glue walls, doorways, windows, roof and other features.

Students of architecture, miniaturists and paper engineers will delight in recreating an outstanding example of American residential architecture, which, in Wrights own words, has become "a source of worldwide inspiration."

About the Author

American architect Frank Lloyd Wright (1867-1959) designed more than 1,000 structures in a career that spanned eight decades. A leader of the Prairie School of architecture, he also designed interiors, wrote 20 books, and was a popular lecturer.
