Good reference. Wish both books were in one. It offers info on each plant so you know if the plant is right for your garden ( soil requirements, etc.). Made a trip yesterday to the garden center, took my books ( I bought 1 and 2). It was a great help

My summer planting was done by the time I got this book, but it's definitely going to be a keeper. The deer just love our garden, and I need some good advice about keeping them away.

Gold winner, Northern California Publishers Authors Awards 2009: "Best Overall," Best Nonfiction," and "Best Interior Text/Layout/Design." Finalist: 2009 Benjamin Franklin Awards, Gardening/Agriculture category. This is an informative book written by an experienced gardener for gardeners with varying levels of expertise. Even gardeners who do not have the challenge of hungry deer in their gardens will find lots of good information in this full-color, information-packed book. With thirty-one years of experience gardening, teaching, and consulting, the author includes description, cultural requirements, bloom, companion plants and landscape use, seasonal interest, maintenance, and propagation for more than 100 species of deer-resistant plants.

'If you're trying to 'garden in harmony with deer,' then the only thing better than having Carolyn's first volume is having both volumes. Nowhere will you find such authoritative advice on which plants really can succeed (and how to help them thrive) when you're besieged by deer. Don't give up--read Carolyn's words of wisdom!' --Greg Pat Williams, HortIdeas
