By Pauline Eike If you love to create exquisitely beautiful gifts for yourself others or if you just love gorgeous books, then this is the book for you. Di Van Niekerk has created a magnificently rich, Embroidered Alphabet Monogram book, that will give you an all-consuming desire to get busy create a family heirloom or a uniquely lovely gift. That is how I felt when I opened the book and found so many of the things I desired to create but didn't have the "know-how". This book explains it all-a real "How to" book! Now I am able to make such beautiful gifts, things I thought I would never be able to do, I can! After reading (in the reviews) that other people had difficulty copying some pages from this book, I made a concerted effort to copy things from all different areas of the book, especially the pages that might be the most difficult to copy. I have had no

problems copying any picture in this book, no matter where it was. Of course, I flatten out the book press down on the spine, (just like I did in college to get good copies). The book is no worse for the wear-the binding has not come apart. As I work my way through the book, embroidering the initials I like best need for gifts, I also plan on changing the color of the letters to colors I prefer - like pink, turquoise or green etc. I plan on picking and choosing the flowers I will use on a particular letter. On some initials I will use fewer flowers and on others I will add more, depending on the recipient my mood! I can't wait to make some gorgeous cards with sayings or just a single word - like the "Cherish" or "Love" page 47. Can't wait to make lovely funny things for my Grand-daughter, Kaitlyn, (Just love the initial "K" in this book on page 80). This is a book you will cherish, as will I. Well, Christmas is coming, have to get busy, now! 0 of 0 people found the following review helpful. Embroidery Silk Ribbon By Lizzie Beautiful work to reproduce.
