**Ren Laubach, Christyna M. Laubach : The Backyard Birdhouse Book: Building Nestboxes and Creating Natural Habitats** before purchasing it in order to gage whether or not it would be worth my time, and all praised The Backyard Birdhouse Book: Building Nestboxes and Creating Natural Habitats:

1 of 1 people found the following review helpful. Can't go wrong!By Christopher EI like this book a lot. I did research

on-line but there really is very little information floating around on how to build the right house for the specific bird(s) you want to attract. The book also does a good job of helping you decide which house makes sense where you live, explains the features that will discourage pest birds from moving in, explains how to use "predator guards" to keep things like snakes, etc., from eating the eggs or chicks. Really everything I wanted in a book like this. 0 of 0 people found the following review helpful. Great book with plans By ThresaGot this for my husband to make me some birdhouses. He likes the instructions in this book and has already made me a bluebird house. 1 of 1 people found the following review helpful. Kudos for Backyard Birdhouse Book By Carol Louise Thanks for the speedy delivery and excellent condition of The Backyard Birdhouse Book. This book is chock full of informative and well-illustrated plans to construct a variety of wild bird houses. We normally borrow books from the library but this book is valuable for anyone who needs to have birdhouse plans on hand for a variety of types of wild birds. Everything you need is right here and the book is good for both the beginner and the experienced wood worker. Great quick reference, great price, great service.

It has been shown that backyard bird conservation has made a difference in certain bird populations. With this carefully researched, handsomely illustrated, and easy-to-use guide, both suburban and rural residents alike now have a compendium of information that will allow you to provide appropriate housing for cavity nesting birds in your area. Join that conservation effort and attract fascinating birds like bluebirds, wood ducks, purple martins, and American kestrels to your backyard.

"...both suburban and rural residents alike now have information at their fingertips...to provide appropriate housing for cavity-nesting birds." -- Wayne R. Petersen, Vice President, American Birding Association  
From the Back Cover  
Create a haven for native birds the naturalists' way. With this beautifully illustrated guide, you'll learn to identify, attract, and house some of North America's most fascinating cavity nesters, including Bluebirds, Purple Martins, Screech-Owls, Wood Ducks, and American Kestrels. Experienced naturalists Ren, and Christyna Laubach provide detailed profiles of 25 species, featuring more than 100 color photographs of adult birds, eggs, and nestlings. In addition, you'll learn how to: -- Construct and mount 8 practical, species-appropriate nestbox designs -- Guard nestlings against predators -- Monitor and keep records of bird activity -- Landscape to attract birds -- Organize and participate in conservation programs
