I highly recommend it to anyone looking to do custom, DIY window treatments. Its comprehensive and covers every type of window covering (except the track types they now have at IKEA). Its an old publication, but the instructions are very clear, easy to understand, complete. I feel like heavy drapes and cornices and such are maybe

a bit old fashioned these days, but you can get such cute modern fabrics on sale at Joanne's for 50% off and pair them with instructions from this book. I've already used it for a set of duponi silk rod pocket drapes and plan to do much, much more. This is great quality publishing, editing, writing and is a book I will use over and over. Buy it!

By C Peterson  
This book has become one of my all time favorites for sewing home window treatments. I actually had an earlier version of this book that didn't provide detailed instructions and was very disappointed with it. When I previewed the Kindle version of this edition I was impressed with the improvements and downloaded the book. The instructions are detailed and easy to understand. It provides great tips for the types of fabrics that work well on each treatment, how to properly measure your windows and make your patterns, and it provides a multitude of variations on common window treatments. I had no problem figuring out the fabric yardage or supplies I needed for all of my projects. The book also provides pictures and illustrations for sewing instructions. With this book, I no longer have to go online or to the fabric store to search for a pattern or spend hours scanning blogs for answers to questions.

Disappointed that this is just a book of pictures of various window treatments. There are instructions for only about 4 very simple treatments, although it is listed as a DIY guide to making the treatments. Not what I was hoping to find.

The most comprehensive DIY window book on the market  
The Complete Photo Guide to Window Treatments makes it easy to choose and construct today's most popular window treatments - 20 styles of valances, swags, and cornices; 20 styles of curtains and draperies; plus 10 types of window shades. Room photographs show each style in a variety of decorating styles, fabrics, and hardware. Each project has step-by-step instructions from beginning to end: measuring the window, cutting the fabric with confidence, sewing or constructing the project, and installing the treatment the professional way. Over 500 how-to photographs and diagrams make it easy to have professional results. This is the big book of DIY window treatments!
