Michael E. Gerber, Anthony C. Bass : The E-Myth Landscape Contractor before purchasing it in order to gage whether or not it would be worth my time, and all praised The E-Myth Landscape Contractor:

2 of 2 people found the following review helpful. It turned the light on in my headBy SSThere is so much valuable information in this tape set I find myself listening to it many times over. The principles discussed make so much sense and I now know why the landscape business I have owned has struggled for so long. Just creating some of the systems discussed has saved me a lot of money in my estimates and has helped me make more money and this is just a small part. When I take the time, and it will take time, creating and applying many of the other systems explained will help

me hire and keep new employees and make day to day operations much easier. Whether you are just getting started or have been in business for years, save yourself the headache and create these systems for your business. You'll have better success and be glad you did. I believe this is also available in a book, but the CD version is much better since I can listen to it with or without my crew on the way to jobs or while stuck in traffic. 1 of 1 people found the following review helpful. Short and sweet. Interesting version from the original and bought this ...By Brett McCurdy Short and sweet. Interesting version from the original and bought this more for motivation than information while driving in the truck (Tony Robbins is better for that). I would have given more stars but it seemed a little repetitive on concepts from the original. Just stick to the original e-myth (cheaper price than this version) and apply same ideas to your field. 0 of 0 people found the following review helpful. It was the perfect thing. By Dad of 10 I gave it to my 12 year old son who decided he wants to be a landscape contractor. He read the book all the way through and learned a lot about how to run a business, instead of how to be run by your business. It was the perfect thing.

This book is two things: the product of my lifelong work conceiving, developing, and growing the E-Myth way into a business model that has been applied to every imaginable kind of company in the world, as well as a product of Tony's extraordinary experience and success in applying the E-Myth to the development of his equally extraordinary enterprise, Super Lawn Technologies, Inc.
