**Rosalind Creasy : The Edible Garden: Herbs Flowers (National Home Garden Club)** before purchasing it in order to gage whether or not it would be worth my time, and all praised The Edible Garden: Herbs Flowers (National Home Garden Club):

0 of 0 people found the following review helpful. GardenerBy joI love gardening and the hedge witch type herbals. This book has it all and recipes for my edible garden. Vinegars and candied flowers for decorating cakes. Plus tips on planting a lot of my favorites, which I am just about ready to do, if mother nature lets me. This series of books are put together well and they are easy to read. Plus the pictures are beautiful, so inspiring !!!0 of 0 people found the following review helpful. Five StarsBy vickyBeautiful book.

I hope you will find growing herbs and edible flowers as rewarding as I do. To help you along, I have shared with you many of my gardens, including their successes and failures, and assembled years of experiences from the many gardeners I have visited around the country. I learned, for instance, that Jim Wilson in North Carolina grows most of his herbs in containers because he has nematode problems; that Carole Saville has moved many of her herbs from New Jersey, to Los Angeles, and then to Berkley and the great majority grow well in all these different climates; and that Cathy Barash had great success overwintering pineapple guava indoors in her Long Island home. I also know that most of you have trouble growing Cilantro and have yet to discover savory (you'll be delighted). Armed with the

information in this book, growing herbs and edible flowers will only add joy to your life.
