It basically 'does what it says on the label'. It has a fantastic range of recipes which give you preparation times and cooking times (all of which will be ready to eat in half an hour). At the foot of each page you also are given all of the nutritional info you need if you are trying to watch your calorie intake/fat intake. Well illustrated and easy to follow recipes. What more do you need in a cookery book. Well there is one more thing a great price. Love it!

With step-by-step techniques and projects, the book is aimed at everyone from the novice home decorator to the experienced DIY enthusiast; includes practical instruction on home maintenance and repairs, painting, paperhanging, tiling, laying floor coverings, bedding, soft furnishings, curtains, insulation, storage, and building features and fittings.
